DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 74 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 74 recites the limitation "the discharge opening" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 54-59 and 76 are rejected under 35 U.S.C. 102(b) as being anticipated by Sloan (4,971,471).

Sloan discloses a mopping device having a mop covering holder 16; a handle sleeve 56; an operating handle 54; and, a mop covering 40 and 46. The handle sleeve includes a pivot joint that is a universal joint 58, the handle is inserted into the handle sleeve, the mop covering is replaceable, is a textile, and is slightly longer than the mop covering holder.

6. Claims 54, 57-61, 63-65, 72, 73, and 75 are rejected under 35 U.S.C. 102(b) as being anticipated by Rees (2,261,411).

Rees discloses a mopping device having a mop covering holder; a handle sleeve; an operating handle; and, a mop covering. The handle is inserted into the sleeve; the mop covering is replaceable; the mop covering is a textile; and the mop covering holder is a reservoir that has at least one discharge opening located in the mop covering holder. The reservoir further includes at least one ventilation opening located on the top side of the mop covering holder, and is manually closable and openable by means of a movable closure element that is a rotatable closure cap.

7. Claims 54, 57, 58, 60, 61, 63-65, 72, 73, 74 as well as understood, and 76 are rejected under 35 U.S.C. 102(b) as being anticipated by Larkin (1,899,392).

Larkin discloses a mopping device having, inter alia, a reservoir having at least one discharge opening on the mopping side of the mop covering holder, at least one ventilation opening (the examiner notes that the air vent 32' is used to allow air to enter

Art Unit: 3723

the reservoir rather than to escape, but it is a ventilation opening none-the-less), and the discharge openings have a valve insertable therein for controlling the flow of fluid therefrom.

8. Claims 54-58, 60, 61, 63-65, 72, and 76 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sibley et al. (1,485,891).

9. Claims 54-58 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 94/15520.

Allowable Subject Matter

10. Claims 62 and 67-71 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
